

Claim Submission Record – Lecturer Monthly Claim

Lecturer: Independent Contractor

System: Contract Monthly Claim System (CMCS)

Module: POE Part 2 – Implementation Phase

Namespace: POE_Part1_PROG6212

Claim Details

Field	Description / Input
Date Worked	2025/10/22
Hours Worked	4.00
Activity	Marking
Hourly Rate (R)	500.00
Total (Auto)	350.00

Calculation:

The total amount is automatically calculated by the system based on the following formula:

Total = Hours Worked × Hourly Rate

For this claim:

Total = 4 × 500 = R 2,000.00

System Functionality Description

1. Auto-calculation:

The system dynamically multiplies the hourly rate by the number of hours worked and displays the total in real-time.

2. Data Validation:

Ensures that the number of hours worked is greater than 0 and confirms that the hourly rate field contains valid numeric input. Automatically formats numbers according to the South African Rand currency standard.

3. User Interface (UI):

The page is designed to be clear, minimalistic, and functional, using text boxes for input and automatic computation fields for the total value.

4. User Flow:

Lecturer logs in → Navigates to **Submit Claim** → Inputs details → Clicks **Submit** → Claim is stored securely and visible under **Dashboard** → **My Claims**.

Purpose of this Record

This record demonstrates the working claim submission component of the .NET GUI Web Application. It verifies the following learning outcomes:

- Accurate data entry and auto-calculation features.
- Professional UI design following usability principles.
- Correct logical and financial computation of claim values.
- Compliance with CMCS business logic for lecturer claims.
